See Section 4 (“What are the risks of investing?”) for an explanation of the risk indicator and for information about other risks that are not included in the risk indicator. To help you clarify your own attitude to risk, you can seek financial advice or use the tool at simplicity.kiwi/calculators/kiwisaver/fund-selector/

*The risk indicator is not a guarantee of the Funds’ future performance. The Default Fund, Defensive Fund, and the High Growth Fund do not have a 5-year history. Accordingly, for the Default Fund the risk indicators were prepared using market index returns to 30 November 2021 and actual returns to 28 February 2023. The Defensive Fund and High Growth Fund risk indicators were prepared using market index returns to 28 February 2023. As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of these funds.

[^] Volatility is how much the value of the fund’s assets goes up and down over a given time period.

Who manages the Simplicity KiwiSaver Scheme?

Simplicity NZ Limited (Simplicity, we, our, or us) is the manager of the Scheme. See Section 7 (“Who is involved?”) for more information.

What are the returns?

Returns are distributed by way of a redemption of units in the Scheme.

How can you get your money out?

You can get your money out of the Scheme when you are 65.

Amounts transferred from an Australian complying superannuation fund can be withdrawn when you reach age 60, in line with the relevant Australian legislation. This excludes investment returns on the amount transferred.

Early withdrawals may also be available for the purchase of a first (or in limited circumstances, second) home, significant financial hardship, serious illness, permanent emigration (excluding Australia), death, and to pay tax or student loan liabilities on foreign superannuation transfers. Conditions will apply. You may be able to make an early withdrawal if you were born with a condition that is expected to reduce your life expectancy.

Subject to relevant law, we may defer payment of a benefit in certain circumstances.

See Section 2 (“How does this investment work?”) for more information about how you can get your money out and limits that apply.

How will your investment be taxed?

The Scheme is a portfolio investment entity (PIE).

The amount of tax you pay in respect of a PIE is based on your prescribed investor rate (PIR). This can be 10.5%, 17.5%, or 28%. See Section 6 (“What taxes will you pay?”) for more information.

Where can you find out more key information?

Simplicity is required to publish quarterly and annual updates for each Fund. The updates show the returns, and the total fees actually charged to investors, during the previous year. The latest fund updates are available at simplicity.kiwi. We will also give you copies of those documents on request.

Structure of the Scheme

The Funds are trusts and are governed by a trust deed (**Trust Deed**) between us and Public Trust, the supervisor of the Scheme (**Supervisor**). The Scheme's assets are held by Public Trust, the Supervisor and independent custodian of the Scheme, on behalf of investors.

The Scheme is a managed investment scheme. This means that your money is pooled with other members' money and invested by us and our investment managers. A managed investment scheme can give you access to investments that you may not be able to access as an individual.

Your contributions and any contributions from your employer are allocated to units in an account in your name. Your account is invested in whichever Fund you select and its value varies in accordance with the returns achieved by the Fund chosen. The value of the units you hold represents your share of the Fund's assets.

The Funds are run independently of one another. This means that the assets of a Fund are not available to be applied to meet the liabilities of any other Fund. For example, a loss in the Growth Fund will not affect members invested in the Balanced Fund.

The Scheme is a defined contribution scheme. This means that the benefits you receive depend on the contributions paid on your behalf, the returns on the Fund you chose, and any money deducted or withdrawn. The value of your investment will change during the term of your membership. There is no Crown guarantee in respect of any investment in a KiwiSaver scheme.

Joining KiwiSaver

New Zealand citizens and those eligible to be in New Zealand indefinitely and who are or normally are living in New Zealand, can become a member of KiwiSaver. You can also join KiwiSaver if you are a state services employee serving outside New Zealand, in a jurisdiction where offering KiwiSaver membership is permitted.

Te hanganga o te Kaupapa

He tarahiti ngā Tahua, ā, he mea urungi e tētahi pukatuku ā-tarahiti (**Pukatuku ā-Tarahiti**) i waenganui i a mātou me Public Trust, te kanohi hōmiromiro o te Kaupapa (**te Kanohi Hōmiromiro**). Ka puritia ngā huarawa o te Kaupapa e Public Trust, te Kanohi Hōmiromiro me te kaitiaki motuhake o te Kaupapa, mō ngā kaihaumi tonu.

He mea whakahaere te Kaupapa. I tōna tikanga, ka whakakotahihia ō moni ki ērā a mema kē atu, ka haumihia ai e mātou ko tō mātou kaiwhakahaere haumitanga. Ko te painga o te kaupapa haumi whakahaere, ka āhei koe te toro atu ki ngā haumitanga tē āhei te toro takitahi atu.

Joining the Scheme

You can join by filling out our online application form at simplicity.kiwi. This is if you are a new KiwiSaver investor or if you are transferring from another KiwiSaver scheme.

If your employer has chosen the Scheme as their preferred KiwiSaver scheme and you are not already a KiwiSaver member, you will automatically be enrolled into the Scheme when you start employment. If you have been automatically enrolled, you can choose to opt out between 14 to 56 days from the day you started your new job.

Simplicity is a default KiwiSaver provider, appointed by the Government under an instrument of appointment. If you are automatically enrolled by the Inland Revenue Department and Simplicity is selected as your default provider, your contributions will be invested in the Default Fund.

You will be issued units in the Fund you choose (see below) at the current unit price. This is determined by dividing the net asset value (the market value of all the investments held minus any unpaid expenses) of the Fund by the number of units on issue, and will vary from day to day. You can find the current unit price on the member website that you can access once you join the Scheme.

Making investments

If you're employed, KiwiSaver contributions are deducted from your pre-tax (gross) salary or wages at a rate of 3%, 4%, 6%, 8% or 10%. If you do not select a rate your default rate will be 3%. You can also make voluntary contributions at any time. If you are contributing to KiwiSaver, you may also be entitled to an employer contribution of 3% of your pre-tax salary or wages. Tax is deducted from employer contributions.

Any member can also make additional voluntary contributions by regular or lump sum payments.

Information on how to make additional contributions is available at simplicity.kiwi.

If you're over 18 and below the superannuation age (currently 65), the Government will (if you're eligible) contribute 50 cents for every dollar you contribute, up to a maximum Government contribution of \$521.43 each year (1 July to 30 June). This is paid directly to your KiwiSaver account around late July each year.

You can change your contribution rate or have a 'savings suspension', subject to some restrictions.

You may also be able to transfer savings from an existing New Zealand or overseas superannuation scheme. To transfer from an Australian complying superannuation fund, you will need to have permanently emigrated to New Zealand.

The amounts referred to in this section may change in the future.

Withdrawing your investments

You are generally not eligible to withdraw your investment in the Scheme until you reach New Zealand superannuation qualification age (currently 65).

Any amount transferred from an Australian complying superannuation fund (excluding investment returns on that amount) can be withdrawn when you reach age 60, if you have 'retired' in terms of the relevant Australian legislation.

Other withdrawals

You may also be able to make a withdrawal in other limited circumstances, such as:

First home: You may be eligible to withdraw your investment (leaving a minimum of \$1,000 in your account) to put towards buying your first home once three years have passed since you joined KiwiSaver.

Significant financial hardship: If you are suffering significant financial hardship (as defined by the Supervisor), you may be able to withdraw some of your investment. Significant financial hardship claims are carefully considered by the Supervisor who has sole discretion as to whether or not to approve your application, and will seek evidence from you to support your application.

Serious illness: You may be able to withdraw your KiwiSaver investment early if you are experiencing terminal illness or permanent disability affecting your ability to work, as determined by the Supervisor.

Life-shortening congenital conditions: You may be able to make an early withdrawal if you were born with a condition that is expected to reduce your life expectancy below 65. The Supervisor will determine whether you're eligible for a life-shortening congenital conditions withdrawal. If you make a withdrawal, you'll no longer be eligible to receive any Government contributions and your employer can stop their contributions.

Permanent emigration (other than to Australia): You may apply to withdraw your full KiwiSaver balance or have it transferred to a foreign superannuation scheme specified in the KiwiSaver Act 2006, one year after your permanent emigration (less the amount of any accumulated Government contributions). Conditions will apply to this withdrawal.

Permanent emigration to Australia: If you emigrate to Australia you will, instead, be able to transfer the full balance of your investment to an Australian complying superannuation fund. Conditions will apply to this withdrawal.

Death: In the event of your death, Simplicity must pay the full balance of your investment to your personal representatives.

- If you have transferred from a foreign superannuation scheme, there are rules in place that may allow you to withdraw an amount to cover any New Zealand tax liability and/or student loan repayment obligations that relate to the transfer.
- We may also have to release some or all of your money under a Court order.
- Provided you are eligible to do so, you can transfer to another KiwiSaver scheme at any time. You can only be a member of one KiwiSaver scheme at a time.

Once we are satisfied you are able to make a withdrawal, we will normally process your application within 1 – 2 weeks. You may make a partial or full withdrawal. We may set terms and conditions for partial withdrawals (such as limits on how often a partial withdrawal can be made, and how much is required to be withdrawn). Currently, the minimum amount for a partial withdrawal is \$100.

See our “Other Material Information” document on the Disclose register companiesoffice.govt.nz/disclose or simplicity.kiwi for more information about withdrawals. See simplicity.kiwi or contact us for the required forms. You will need to satisfy certain legal requirements (including providing evidence of entitlement to withdraw) and our processes, before you can make a withdrawal.

Under the Trust Deed, in limited circumstances we can suspend the ability to make withdrawals.

How to switch between funds

You are able to switch investments between the Funds. You can do this online via our member website that you can access once you join the Scheme. Completed switch requests will be made on the next available unit price. A switch will be treated as a redemption from one fund and an application into another fund. We do not currently charge an entry/exit fee or a buy/sell spread.

4. What are the risks of investing?

Understanding the risk indicator

Managed funds in New Zealand must have a standard risk indicator. The risk indicator is designed to help investors understand the uncertainties both for loss and growth that may affect their investment. You can compare funds using the risk indicator.

Risk indicator*

See Section 3 (“Description of your investment options”) for the filled-in risk indicator for each of the Scheme’s investment options.

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund’s assets goes up and down (volatility). A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or use the tool at [simplicity.kiwi/calculators/kiwisaver/fund-selector](https://www.simplicity.kiwi/calculators/kiwisaver/fund-selector).

Note that even the lowest category does not mean a risk-free investment, and there are other risks (described under the heading “Other specific risks”) that are not captured by this rating.

This risk indicator is not a guarantee of a fund’s future performance. The Default Fund does not have a 5-year return history. Accordingly, for the Default Fund the risk indicator was prepared using market index returns to 30 November 2021 and actual returns to 28 February 2023. The High Growth Fund and the Defensive Fund do not have a 5-year return history. For both funds, the risk indicator was prepared using market index returns to 28 February 2023. As a result, the risk indicators may provide a less reliable indicator of the potential future volatility of these Funds. While risk indicators are usually relatively stable, they do shift from time to time. You can see the most recent risk indicator in the latest fund update for the Funds.

Investment Risk	Description
Market risk	The value of investments may rise or fall as a result of developments in economies, financial markets, and regulatory or political conditions. The performance of individual assets, securities, and issuers can impact returns.
Liquidity risk	<p>There is a risk that some assets of a Fund may not be able to be converted into cash, because of lack of a market in which to sell them, or if the market is disrupted. This particularly applies in the following circumstances:</p> <ul style="list-style-type: none"> All Funds except the High Growth Fund have exposure to loans secured by first mortgages over residential properties, where there is no active market to sell into. The Growth and High Growth Funds have exposure to unlisted securities issued by New Zealand businesses with high growth potential. All Funds except the Default Fund have exposure to unlisted property investments which are intended to be held as long term rental assets. <p>There may be increased liquidity risk to the below funds:</p> <ul style="list-style-type: none"> The Defensive Fund has a benchmark allocation to illiquid assets of 20%. This includes 15% (range 0% to 20%) to loans secured by first mortgages over residential properties and 5% (range 0% to 10%) to unlisted property investments. The High Growth Fund has a benchmark allocation to illiquid assets of 17.5%. Investment Risk	Description
Interest rate risk	The market value of fixed interest securities changes when interest rates change. The impact this has on a Fund will depend on the term of the fixed investment and the fixed interest rate relative to market rates. If the general level of interest rates rises, the value of fixed interest securities falls.
Currency risk	We have a policy of hedging overseas share investments 65% to the NZ dollar. There may be fluctuations in value, and the actual percentage may vary. There may also be additional requirements to pay for the cost of hedging if the NZ dollar falls relative to other currencies.
Credit risk	Credit risk is where the issuer of fixed interest securities may fail to pay interest and repay principal, or where negative perceptions of the issuer's ability to make such payments may cause the price, and therefore value, of their securities to decline.

Other specific risks

Property development risk

All Funds except the Default Fund have an exposure to residential property development (see SIPO for details). There are risks that increases in construction costs or construction delays, changes in property valuations and residential rental markets could have a negative impact on returns.

Loan default risk

All Funds except the High Growth Fund have an exposure to loans secured by first mortgages over residential properties. While the lending criteria are conservative, there is a risk that a borrower defaults and the full value of the loan is not recovered.

5. What are the fees?

You will be charged fees for investing in the Scheme. Fees are deducted from your investment and will reduce your returns. The fees you pay will be charged in two ways:

Individual action fees

We do not currently charge contribution, establishment, termination, or withdrawal fees, and we intend that, for the foreseeable future, we will not introduce any such fees. However, we could charge these or other fees in the future. Accordingly, you may be charged other fees on an individual basis for investor-specific decisions or actions. See the Disclose register at companiesoffice.govt.nz/disclose for more information.

Example of how fees apply to an investor:

Ian invests \$10,000 in the Growth Fund. The starting value of his investment is \$10,000. He is charged management fees, which work out about \$29 (0.29% of \$10,000) per year. These fees will be more or less if his account balance has increased or decreased over the year.

Estimated total fees for the first year:

 Fund Charges	\$29 (0.29% of \$10,000)
 Membership Fee	NIL
 Individual Action Fee	NIL
 Total Fees	\$29

See the latest fund update for an example of the actual returns and fees investors were charged.

This example applies only to the Growth Fund. If you are considering investing in other funds or investment options in the scheme, this example may not be representative of the actual fees you may be charged.

The fees can be changed

We are entitled to alter charges (including increasing fees or introducing new fees) at any time with the prior approval of the Supervisor. There are no limits on the charges that may be set, subject to the requirement under the KiwiSaver Act 2006 to not charge unreasonable fees. Details of the current charges are set out above and in the annual financial statements of the Scheme.

Every three months, we must publish a fund update for each Fund showing the fees actually charged during the most recent financial year. Fund updates, including past updates, are available at [simplicity.kiwi](https://www.simplicity.kiwi).

6. What taxes will you pay?

The Scheme is a portfolio investment entity (PIE). The amount of tax you pay is based on your prescribed investor rate (PIR). To determine your PIR, go to ird.govt.nz/roles/portfolio-investment-entities/find-my-prescribed-investor-rate. If you are unsure of your PIR, we recommend you seek professional advice or contact Inland Revenue. It is your responsibility to tell us your PIR when you invest or if your PIR changes. If you do not tell us, a default rate may be applied. If the rate applied to your PIE income is lower than your correct PIR you will be required to pay any tax shortfall as part of the income tax year-end process. If the rate applied to your PIE income is higher than your PIR any tax over-withheld will be used to reduce any income tax liability you may have for the tax year and any remaining amount will be refunded to you by Inland Revenue.

See the Other Material Information document on our website [simplicity.kiwi](https://www.simplicity.kiwi) or on the Disclose register at companiesoffice.govt.nz/disclose for more information about the tax consequences of an investment in the Scheme.
